ABOUT ME

A recently graduated full-stack software developer with strong Object-Oriented Programming (OOP) fundamentals and a passion for building scalable, enterprise-grade applications. Experienced in developing robust single-page applications, managing relational and non-relational databases, and integrating complex web services. Proven ability to collaborate effectively in team environments to deliver clean, well-documented code while rapidly adapting to emerging backend and frontend technologies.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript, Kotlin, C#, C++, HTML, CSS.
 - **Front-End Development:** ReactJS, NextJS, Tailwind CSS, Single-Page Applications (SPA), Responsive UI Design.
 - **Back-End & API Development:** NodeJS, ExpressJS, RESTful APIs, API Integration, Secure Authentication (JWT, OAuth).
 - **Database Management:** PostgreSQL, SQL, MongoDB, Redis, Firebase.
 - **Tools & Methodologies:** Git, Postman, Agile Collaboration, Visual Studio, Android Studio, Xcode, Figma.
 - **Infrastructure:** Kubernetes, docker, AWS Cloud, CI/CD, Jira
-

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Contract) | Gujarat Tech Solutions

January 2022 – September 2022

- **Distributed Logic:** Designed secure backend services using Go and Node.js, integrating complex third-party APIs for financial and e-commerce platforms.
- **DevOps Integration:** Automated deployment workflows using Docker, reducing environment configuration time and improving consistency across development and production stages.

Intermediate Software Developer (Permanent, Full-Time) | Budventure Technologies

January 2021 – December 2021

- **Full-Stack Delivery:** Developed and maintained enterprise-scale web applications using C# and modern JavaScript frameworks, ensuring high availability for logistics and distribution clients.
- **Architecture & Scaling:** Contributed to the migration of monolithic legacy services into scalable microservices, focusing on service decoupling and high-transaction reliability.
- **Frontend Excellence:** Engineered responsive user interfaces in Angular, implementing complex state management and reactive programming patterns to improve user engagement.
- **Collaboration:** Partnered with cross-functional teams to translate business requirements into technical roadmaps, consistently meeting sprint deadlines in a fast-paced environment.

Software Developer Internship (Permanent, Full-Time) | Shubham Metals

June 2020 – December 2020

- Developed Python and C++ scripts to automate inventory tracking and data processing, reducing manual workload for the trading operations team.
- Built internal software tools that streamlined coordination between the Ahmedabad office and field teams in a hybrid work environment.
- Supported database optimization and reporting initiatives, helping leadership access accurate operational data for faster decision-making.

EDUCATION

- Diploma in Mobile Application Design and Development | Algonquin College | 09/2023–04/2025 | Ottawa, ON.
- Bachelor in Computer Science | Nirma University | 06/2018–06/2022 | Ahmedabad, Gujarat, India.

TECHNICAL PROJECTS

Orbit: Distributed Systems Task Orchestrator

- **Infrastructure & Core:** Built a distributed workload coordination engine using Java/Rust OOP principles to manage clustered background tasks.
- **Orchestration:** Deployed a self-hosted, multi-node **Kubernetes** cluster and **Docker** containers to handle automated scaling and fault tolerance.
- **CI/CD:** Integrated automated testing and system deployment workflows directly to AWS environments using GitHub Actions.

GeoStream: Property Analytics Pipeline

- **Big Data Processing:** Engineered a high-throughput data processing pipeline using **Python** and **Apache Spark** to clean and transform large-scale datasets.
- **Database Optimization:** Designed a relational **PostgreSQL** schema utilizing advanced indexing strategies to drastically reduce SQL query execution times.
- **Microservices:** Developed backend microservices to pipe real-time analytical data metrics using optimized JSON payloads.

Nexus: Infrastructure Monitoring Dashboard

- **Frontend Chops:** Developed a highly responsive Single-Page Application (SPA) using **React** and **TypeScript** for live infrastructure tracking.
- **Asynchronous UI:** Implemented state management and **AJAX** polling to ensure real-time dashboard updates without page reloads.
- **Backend API:** Constructed a secure **Node.js** and Express backend framework to stream system metrics from a relational database.

SOFT SKILLS

- **Problem-Solving:** Exceptional debugging capabilities and systemic analysis skills.
- **Collaboration:** Experienced working in collaborative team pipelines to meet strict sprint deadlines.
- **Adaptability:** Eager to learn new corporate frameworks, infrastructure environments, and system methodologies.
